

3-Developer Work Distribution & Zero-Conflict Git Strategy

Team Size: 3 Developers Scope: Chat (Post 27/08/26) + 4 OMP Deals Docs Target Delivery: Dec 30 (Demo in 2 Weeks)

Zero-Conflict Git Architecture & Branching Rules

Mandatory for all 3 developers

RULE 1: Strict Folder & File Isolation

Har developer ko alag domain aur folder assign kiya gaya hai. Kabhi bhi ek dusre ke folder ki files ko edit na karein.

RULE 2: Modular Routing Pattern (AppRoutes.jsx Zero Conflict)

Main AppRoutes.jsx me baar baar edits nahi honge. Dev 2 aur Dev 3 apne dedicated sub-route files me routes define karenge.

RULE 3: Safety Mandate (Zero Regression)

Existing working pages (CRM Dashboard, ERP, HR, Support, OAL, Auth contexts) ko **TOUCH NAHI KARNA**. Sirf naye files aur additive routes banenge.

Dev 1 Branch

```
git checkout -b feature/dev1-branding-showcase
```

Works only in Showcase, Auth Gateway & Branding.

Dev 2 Branch

```
git checkout -b feature/dev2-omp-inventory-marketing
```

Works only in Marketplace, Inventory & Marketing.

Dev 3 Branch

```
git checkout -b feature/dev3-omp-finance-executive
```

Works only in Desking, BHPH, & Executive Admin.

⚠️ Git Conflict Prevention & Quality Checklist

- Do NOT touch any file in `src/pages/crm/`, `src/pages/oal/`, or core auth layouts.
- Dev 2 and Dev 3 must ONLY register routes inside their respective sub-route files.
- Always run `git pull origin main` and test local build (`npm run build`) before raising a PR.
- Keep commits small and feature-specific with task IDs (e.g., `feat(omp): implement E-13 deal calculator`).
